Launching Your Personal POIS℠ Process

When we asked past graduates their best practices to integrate the tools and deliver their personal Best Ever, they recommended taking these actions within 1-2 weeks of their launch session:

- Come to your first POIS Team meetings with the same focus and commitment with which you leave your Launch Session.
- Meet with your upline leader to discuss the tools you are already using and those you want to gain more mastery with—specifically to impact your performance (including your Performance Propeller), your partnerships, and being your best ever.
- Share your experience and your favorite tools with the most important people in your personal life.
- Make the tools accessible to your life (e.g. bring your Quick Reference Card to your meetings, post your tool cards at your desk where you can see them, use your journal as a resource, post your Homeward Bound Framework tool card in your car).
- Meet and be all-in with your Buddy.
